

Freedom of Choice, I have chosen XM Radio, for the listening pleasure of no commercials, for the variety of Music, News and Kid programs available. The NAB is unwarranted in trying to prevent me from getting traffic updates in my community. This really is a public service, that should be available on any Radio station. It's called keeping up with the times, you shouldn't allow change not to happen if it's beneficial to a society.

I choose to listen to XM Radio, I also feel that public service announcements which include Weather, Traffic, or emergency news alerts should not be restricted, so as to force me to listen to another's broadcast.

Note the word Force, Public services are for the benefit of all individuals in a community, not for the benefit of the Owners of competing stations.

Thank You
Thomas Preston
